

Visual Paradigm for UML Personal Edition (VP-UML LE) is a modeling platform designed for learning UML™ modeling through our best-of-the-breed and award-winning visual modeling technology that facilitates UML visualization in the latest UML 2.1 notation in 13 different types of diagrams, as well as ER Diagrams, Requirement Diagrams, CRC Diagrams and Textual Analysis.

Powerful and Easy-to-use GUI

Now developers can create diagrams much faster than any tool on the market through VP-UML's most intuitive resource-centric and mouse location sensitive GUI. Tidying up your complex and messy diagrams is just a matter of one mouse click by using VP-UML's automatic diagram layout technology, yet the unique gesture editing capability makes diagramming a fun task.

Extensibility and Custom Design Support

Extending UML capabilities beyond the latest UML 2.1 is no longer a dream! Now, VP-UML allows you to design new notation or incorporate custom shapes or symbols by using image icon import, UML profile or Visio integration capability. VP-UML LE is for non-commercial use only. All outputs of VP-UML LE have a single line water mark at the top left corner stating the software is for non-commercial use only.
